EXPERIENCE

FanCrew — Product Designer / UI/UX Designer

- Established and extended the FanCrew design system in Figma, creating reusable components, variants, tokens, and interaction states across Creator and Crew experiences.
- Designed complex project lifecycle states and edge cases, turning fragmented creative hiring and collaboration into a structured product experience.
- Defined Creator & Crew product architecture, including dashboards, discovery, profiles, project creation, applications, hiring, and project workspace.
- Designed MVP 1 of a two-sided Creator–Crew marketplace, mapping end-to-end workflows from discovery and hiring to collaboration, delivery, revisions, approval, and payment.

UI/UX Designer & Visual Strategist | Valasys Media | 2024–Present

- Designed high-clarity visuals, layouts, and visual metaphors for marketing and client campaigns, ensuring consistency across all B2B communication.
- Created website designs for valasys.ae, improving layout hierarchy, readability, and visual alignment across pages.
- Designed professional proposal decks and pitch documents to support sales, demand-gen, and client onboarding.
- Led major seasonal marketing campaigns including Halloween and Black Friday — designed landing pages, DSP ad creatives, website exit-intent pop-ups, and conversion-focused forms to improve lead capture and engagement.
- Designed UI for the B2B Sales Intelligence Platform (V2.0), redesigning the entire product from scratch.
- Goal: Build an intuitive, modern workflow for sales teams and improve feature discoverability.
- Tasks: User flows, wireframes, dashboard UX, interaction patterns, feature layouts, and full design system creation.
- Results: A cleaner navigation structure, reduced cognitive load for users, improved usability, and a scalable interface for future product expansion.
